ENVIRONMENTAL EDUCATION AND MAINTENANCE CULTURE AT THE GRASSROOTS

Rosemary Ossai N.

ENVIRONMENTAL EDUCATION ...

About the Book

Environmental Education and Maintenance Culture at the Grassroots consists of 20 units covering a variety of topics such as sustainable development, biodiversity, waste disposal, pollution, women and sustainable development, population, aesthetics and maintenance culture.

A viable environmental policy will extend its programmes to the grassroots level. Environmental education through career subjects in the formal school system is a channel to achieve this and it offers a durable and sustainable means for maintaining standards and caring for the environment.
